

ADA Street Design and Applications

CONTENT

- Laws and Regulations
- Public Right-of-Way Accessibility Guidelines (PROWAG)
- Crossings and Curb Ramps
- Steep Terrain

ABOUT

The class provides a review of the design requirements for ADA design of all street users, particularly small urban and rural areas. Difficult terrain applications will illustrate innovative design solutions. The course will present elements of urban street designs that can increase access and inclusion for all. The webinar is designed for planners, engineers, and technicians who are responsible for planning, design and operations of roadway systems.

INSTRUCTIONAL STAFF

Sheila Lyons, PE
Former ODOT Bicycle & Pedestrian Program Manager

Kate Hunter-Zaworski, PhD, PE
OSU, Associate Professor

SCHEDULE

Tuesday, February 16, 2021 from 8:30am - 12:00pm

A detailed agenda will be distributed prior to the course date

LEARNING OUTCOMES

At the completion of the course, participants will have an increased understanding of:

- Design for vulnerable populations
- The Federal regulations and guidance for the design and operation of accessible pedestrian facilities
- Applications in difficult terrain
- Resources available to assist transportation professionals in design and operation of inclusive transportation facilities

COURSE LOCATION

Webinar format using Zoom

ENROLLMENT

Register and submit the course fee online. Make checks payable to The Kiewit Center and submit at least one week prior to the class. Zoom credentials will be provided after registration. If a registration must be canceled, a full refund can be made only if a notice of withdrawal is received at least one week prior to the course starting date. A fee of one-half of the course tuition will be charged for cancellations after that period. *Substitute attendees are encouraged.*
