This year, the Transportation Working Group (TWG) of the International Council of Systems Engineers (INCOSE) is coordinating a Systems Engineering Networking event on Tuesday, January 28th, 2014 in Los Angeles. They are featuring this special networking event aimed mainly at the Californian and West Coast transportation agencies during the INCOSE International Workshop.

The TWG has an initiative to promote and encourage the growth and implementation of Systems Engineering practices within the domain of transportation in the United States. The purpose of the Networking Day is to bring together agencies that are or may not recognize that they are applying systems engineering and illustrate: 1) they are using SE practices; and, 2) they are not alone. TWG would like to feature University-level research that can affect the transportation domain and are seeking presenters to spur dialog and be available for networking opportunities with attendees. If you identify a potential speaker or topic, please contact Jennifer Russell at RussellJe@pbworld.com.
